LOT OVERVIEW

Sun dried robusta from Garut and Temanggung at 400 to 900 m, density and colour sorted, screening 13 up with 16 up available on request. Milder and less aggressive than Lampung, which makes it the usual choice for espresso blends that want body and crema without a dominant robusta edge, at whichever defect grade the recipe or the extraction line is costed on.

Figures are typical for the current crop and are confirmed lot by lot on the contract. The signed grading sheet and cupping score travel with every shipment.
